

## Workbook : Antimicrobial Drugs 2.

This workbook has been designed to be used in conjunction with the course reading booklet. You are free to complete as few or as many of the tasks as you wish. The workbook can then be added to your CPD portfolio as evidence of your activity. It also provides room for you to reflect your thoughts in relation to this course and your learning experience.

### Self-assessment :

<b>1</b>	Name the four targets of antifungal therapy, giving a specific drug example for each :  1    2    3    4
----------	--

<b>2</b>	<p>What type of antifungal may be suitable for managing superficial fungal infections in the skin ?</p> <p>How does this drug work ?</p>
<b>3</b>	<p>You suggest your patient purchases a cream containing of the azole drugs for the management of athlete's foot. What advice would you give your patient, and what should you check before suggesting this kind of drug ?</p>

<b>4</b>	Your patient tells you that they are planning a trip to Kenya in the next few weeks, and that their GP has given them chloroquine as a prophylactic measure against malaria. What suggestions might you make to this patient, and why ?

<b>5</b>	Give the stages of viral replication , and give an example of an antiviral drug that might be effective in that stage.
----------	--

**Reflection.**

Take some time to think about the learning that you have completed using this course. Was it useful, was it interesting, was it applicable to your practice? Is there anything in particular you have gained from the course, and does it encourage you to alter your practice? Have you enjoyed it?

These are all questions you should ask yourself before you complete your reflective account below, as these are key points that you need to mention.

How much time have you spent completing this course?	
Did you complete the course on your own, or as part of a learning group?	

Your general reflective account :
